

Targeting *MET* in advanced NSCLC care: A multidisciplinary perspective

Chair

Enriqueta Felip, MD, PhD, Vall d'Hebron University Hospital, Barcelona, Spain

Faculty

Umberto Malapelle, PhD, University of Naples Federico II, Naples, Italy

Release date: November 28, 2022

Expiration date: November 28, 2023

Estimated time to completion: 1.0 hour

Available CME credits: UEMS-EACCME® accreditation pending

Activity description

This educational activity consists of two EXPRESS expert presentations and an expert roundtable discussion, which have been submitted for accreditation.

During the EXPRESS expert presentations, the speakers will:

- Highlight their role in a patient-centered multidisciplinary team for the treatment of advanced NSCLC
- Illustrate the clinical value of *MET* alterations
- Examine current and upcoming treatment options for patients with *MET* alterations
- Showcase advanced molecular techniques for the identification and assessment of *MET* alterations
- Discuss monitoring and management of paraneoplastic syndromes, side effects of *MET* TKIs, and patient communication and expectation management

The roundtable discussion focuses on the implementation of a multidisciplinary team care plan and addresses coordination and communication strategies as well as practical insights for individualized treatment plans using targeted therapies.

Target audience

This activity is intended for oncologists, pulmonologists, pathologists, and other healthcare professionals involved in the diagnosis, treatment, and management of NSCLC patients in Europe.

Educational objectives

After completing this activity, the participant should be better able to:

- **Explain** the roles and responsibilities of different specialists within the MDT care team for advanced NSCLC
- **Integrate** advanced molecular diagnostic techniques to assess *MET* alterations in different clinical stages of the management of NSCLC

- **Develop** personalized treatment strategies, including the use of targeted therapies such as MET TKIs based on clinical evidence on their efficacy and safety, and also manage treatment-related side effects
- **Implement** patient-centered MDT care plans in clinical practice, making use of optimal communication and coordination techniques

Physician continuing medical education

An application for accreditation (1.0 ECMEC®) has been submitted to UEMS-EACCME® for this educational activity. More information is expected at the end of January 2023.

Method of participation and request for credit

There are no fees for participating in, and receiving CME/CE credit for this activity.

In order to claim credit, participants must complete the following procedures during the period November 28, 2022, through November 28, 2023:

1. Read the educational objectives, accreditation information, and faculty disclosures
2. Complete the webcast and two EXPRESS expert presentations
3. Take the post-activity test and complete the evaluation
4. Indicate the number of credits earned and download the certificate of CME credit (If you have completed the evaluation form, you will be notified by email once the UEMS-EACCME® accreditation has been approved.)

Planners and managers

The Ology Medical Education planners and managers have nothing to disclose.

Provider information

Provided by Ology Medical Education.

Financial support

This activity is supported by an independent educational grant from Merck KGaA.

Disclosure of unlabeled use

This educational activity may contain discussion of published and/or investigational uses of agents that are not indicated by the FDA. The planners of this activity do not recommend the use of any agent outside of the labeled indications. The opinions expressed in the educational activity are those of the faculty and do not necessarily represent the views of the planners. Please refer to the official prescribing information for each product for discussion of approved indications, contraindications, and warnings.

Disclaimer

Participants have an implied responsibility to use the newly acquired information to enhance patient outcomes and their own professional development. The information presented in this activity is not meant to serve as a guideline for patient management. Any procedures, medications, or other courses of diagnosis or treatment discussed or suggested in this activity should not be used by clinicians without evaluation of their patient's conditions and possible contraindications and/or dangers in use, review of any applicable manufacturer's product information, and comparison with recommendations of other authorities. The course

materials are for educational purposes only and should not be reproduced or distributed in any way.
